ABOUT US

ALTIM ALÜMİNYUM San. ve Tic. Ltd. Şti. was established in 2003 and operates in the production of aluminum profiles and serves many companies and sectors in line with customer demands.

In addition to producing quality products; not to harm the ecological balance, to use energy, raw materials and natural resources efficiently, to minimize waste at the source, to improve occupational health-safety and environmental awareness are our primary goals.

OUR VISION

Our vision is to become a leading and pioneering brand not only in Turkey but also internationally in the field of aluminum profile production. We aim to make a difference in the sector and increase our competitiveness by using innovative technologies and sustainable production methods. At the same time, our main goals are to develop an environmentally sensitive production model by considering the ecological balance and to be recognized as an environmentally conscious company in the sector. We invest in digitalization and innovative business models to reach wider audiences and make our growth sustainable. By providing a working environment that supports the personal development of our employees and keeps occupational safety and health standards at the highest level; we build long-term success together with our employees, business partners and customers.

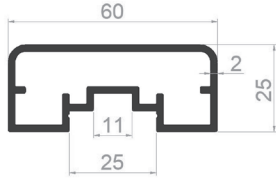

Altım Alüminyum aims to continuously improve its business processes by closely following the developments in the sector, to provide services that will provide added value to our customers, and to advance confidently into the future by reinforcing its strong position in the sector. Our goal is to ensure sustainable growth in local and international markets as one of the most reliable brands in the sector.

OUR VISION

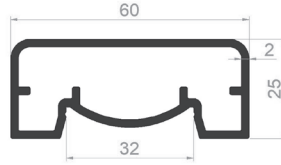

As Altım Aluminum, our primary goal is to provide quality and innovative products that make a difference in aluminum profile production by meeting the needs of our customers in the best way.

In our production process, we attach importance not only to high quality but also to environmental responsibility. We adopt a sustainable production approach by using energy, raw materials and natural resources in the most efficient way. Minimizing waste at its source, working in accordance with occupational health and safety principles, and creating a safe and conscious environment for both our employees and our environment are among our core values. By integrating the feedback we receive from our customers into our business processes, we produce innovative solutions for the needs of the sector. In order to increase customer satisfaction, we meticulously evaluate each project and offer fast and effective solutions to the demands of our business partners in different sectors. With our expert staff and modern production facilities, we aim to be a reliable and value-creating business partner in local and global markets.
